📁 PROJECTS

Upload Central ⧉
UploadCentral is the ultimate online storage solution for all your files. Whether you're looking to store documents, images, videos, or any other type of file, UploadCentral has you covered.
- Hassel-free login: sign in with just your google Id directly.
- Multiple file types supported: Store any kind of file, including documents, images, videos, and more.
- Access from anywhere: Log in to your Upload Central account from any device with an internet connection to access your files.

Firebase and Firestore for developing backend solutions, along with Node.js and Express.js for server-side scripting. Additionally, I have expertise in utilizing React for developing engaging and intuitive frontend interfaces.

Ecommerce Backend ⧉
T-shirt store
Tech stack Used:-
- Mongo DB for database.
- Express as backend framework .
- Uses MVC architecture
- Node mailer integration for sending mails.

Already packed with an array of impressive features and with many more in the pipeline, we're constantly pushing the boundaries to deliver the best experience for you.

Frontend Projects
I have developed several front-end projects, including clones of popular platforms such as **PAYTM** ⧉ , **SHOPIFY** ⧉ , and **RODE** ⧉ , utilizing *Tailwind CSS* for seamless styling and **responsive** design. With attention to detail and a focus on user experience, these projects offer a high-quality and engaging interface for users to interact with.

JavaScript Projects
I have developed multiple mini-projects utilizing JavaScript, such as a **QR code generator** ⧉ , **random joke generator** ⧉ , **and a JavaScript-based game (Rock-Paper-Scissors)** ⧉ , among others. These projects showcase my proficiency in JavaScript and my ability to develop functional and engaging applications.

Miscellaneous Projects
I have successfully developed full-stack projects using the **MERN (MongoDB, Express.js, React, and Node.js)** stack, including a **full-stack todo application** ⧉ and an **appointment booking application** ⧉ . These projects demonstrate my expertise in using modern web technologies to deliver dynamic and responsive applications with a focus on user experience and functionality.
